**Helpful Tips About Snow Removal**
- Avoid driving if you can, allow the snowplows to accomplish their task.
- Plowing operations are interesting and especially catch the attention.
- Remove any portable basketball hoops from the street to allow for curb plowing. Remember, most snowplows are as tall as the hoop.
- Park your vehicles off the road. Township ordinances prohibit on-street parking.
- Rock salt is generally applied prior to plowing to prevent snow and ice to be removed. Rock salt is also applied after plowing move. Salt reacts with moisture and creates a brine solution to allow driving conditions.
- Snow removal crews to plow the road more efficiently and from curb to street apron. When the snowplow arrives, there will be less snow piled up to be turned over back into the driveway.
- To plow all the Township streets once takes approximately eight (8) hours.
- Concentration, so please instruct children to avoid the snowplows.
- To make payment go to WWW.TWPOCEANNJ.GOV click on Tax & Utility Information Look Up. Accepting Credit Cards, Debit Cards & ACH.

- Now you can leave caps/lids ON Clean & dry before recycling

New materials added

- Chipboard Food/tissue boxes
- Aluminum foil wrap & trays
- Plastics Recycle
  - Bottles, jars, food containers, etc.

JULY 2022
A Guide to Healthy Habits for Cleaner Water

Stormwater pollution is one of New Jersey’s greatest threats to clean and plentiful water, and that’s why we’re all doing something about it.

By sharing the responsibility and making small, easy changes in our daily lives, we can keep common pollutants out of stormwater. It all adds up to cleaner water, and it saves the high cost of cleaning up once it’s dirty.

As part of New Jersey’s initiative to keep our water clean and plentiful and to meet federal requirements, many municipalities and other public agencies including colleges and military bases must adopt ordinances or other rules prohibiting various activities that contribute to stormwater pollution. Breaking these rules can result in fines or other penalties.

Easy Things You Can Do Every Day To Protect Our Water

Township of Ocean Snow Removal Program Facts

- It takes approximately four (4) hours to spread one application of salt on Township streets
- To plow all the Township streets once takes approximately eight (8) hours.
- Rock salt is generally applied prior to plowing to prevent snow and ice from bonding to the road surface. Once bonded, it is difficult to remove. Salt reacts with moisture and creates a brine solution to allow snow and ice to be removed. Rock salt is also applied after plowing to improve driving conditions.

Helpful Tips About Snow Removal

- Park your vehicles off the road. Township ordinances prohibit on-street parking during plowing operations. This will allow the snow removal crews to plow the road more efficiently and from curb to curb. (Township Code Section 385-15)
- Wait for the snowplow to plow your street before clearing the end of your driveway. Township Code prohibits all persons from throwing, casting, placing or depositing snow and ice, which accumulates within private property, on streets within the Township of Ocean. (Township Code Section 336-15 through 336-17)
- Shovel the majority of the snow from your driveway to the left side (when facing your home from the street). When the snowplow arrives, there will be less snow piled up to be turned over back into the driveway apron.
- Remove any portable basketball hoops from the street to allow for curb to curb plowing. Remember, most snowplows are as tall as the hoop.
- Plowing operations are interesting and especially catch the attention of children. However, plowing is dangerous and requires extreme concentration, so please instruct children to avoid the snowplows.
- Avoid driving if you can, allow the snowplows to accomplish their task and make the roads safer for traveling.
